Test results for the Phoenix 4 burner gas barbecue

The Salzburg Barbecue Bulls tested the Phoenix 4 burner gas barbecue for the first time on July 22nd 2009. We served finger food, catering for 140 people in the M1 of Salzburg, and I must say I am very enthusiastic about the functionality of this barbecue. The gas burners work very well and can be easily and individually controlled. The LED-lights in the control knobs are an added bonus especially for providing extra visibility during the evening time.

In addition, it is worth nothing that our very own MISS AUSTRIA, Anna Hammel, was the first guest to eat from this barbecue and she also spoke very highly of it.

This barbecue can be cleaned easily and perfect barbecue results can most certainly be achieved time after time!

I would highly recommend this outdoor kitchen to all customers.

Best regards,
Helmut Karl
